Morning All,

Sharing the video is harder than I thought - can you let me know if you would like to view it (or perhaps the slides are enough!) and I will have to send it individually/separately via Egress which is our new file sharing system.

Thank you

Subject: CLLD Meeting Info - slides/recording

Dear All,

Following on from today's meeting please find attached the slides we used and a link to a recording for those of you who were unable to attend (or who did attend but want to relive the experience!).

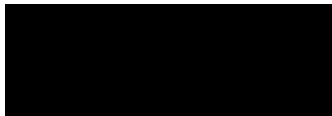

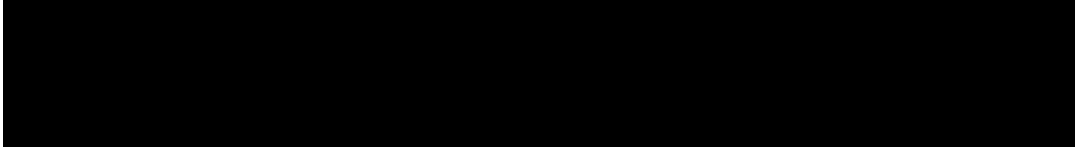

Next steps;

- you will hear from us shortly regarding deeds of variations and our understanding of your forecast delivery (outputs and results) on a monthly basis - and it is these figures we will be closely monitoring in order to minimise underperformance.
- We will start to generate weekly reports from [REDACTED] so you are able to track the evidence/monitoring paperwork against target from w/c 25 April (if you need any info before then let us know)
- We will start monthly meetings from May - please complete [REDACTED] to indicate your preferred day/time - we will then schedule these meetings as a recurring appointment in the first week of the month (same day/time). We realise Monday 2 May is a bank holiday so would schedule this for the following week - but picking this slot is an indication you would like your projects monthly meeting on a Monday. Hope that makes sense! NB if your organisation has 2 projects we will do them both together unless you tell us otherwise.
- Also you can find attached a list of the projects that have been extended April

2022-December 2022 and contact details.

I dont think everyone will be able to access the video - there is an issue with permissions - will try and sort this out tomrrow but in the meantime here are the slides and the video for those who can access it.

Please let us know if you have any questions
